

P.11.L.3. after "disk member with", insert -auxiliary-.

P.12.L.1. before "semielliptical", insert -forwardly inclined-.

P.12.L.1. after "symmetrically", insert -,equiangularly-.

P.12.L.9. after "base lines", insert -, or angular junctures-.

P.12.L.10. change "flare upward and out, sloping toward the blade periphery to -] from

an unsevered angular base line juncture, extend radially outward and conterminously with three sides severed and radially inward while deflected substantially in an axial direction-.

P.13.L.12. after "axis." insert -Leading inclined-.

P.14.L.23. change "inclined at its leading end toward the center of the blade",

to -radially inclined inward from trailing end to leading end,-.

P.14.L.26. after "flat", insert -even, bilaterally-.

P.14.L.26. after "unobstructed", delete -side-.

P.15.L.18. after "life" insert -of the angular cutting edges-.

P.15.L.33. after "modular" insert /with a connecting planar structure embodiment-.

P.18.L.9. before "forward" insert -semicircular-.

P.18.L.13. before "Rear [rear]" insert - Semicircular-

P.19.L.5. after "protrude into the", insert -corresponding-.

P.19.L.5. after "other" insert -flat laid-.

P.19.L.5. after "convenient" insert -vertically stacked-

Claims: Cancel all claims of record and substitute new claims 21 to 37 as follows.

US Patent 5,875,700, claims 1-4 are additionally presented and the subject matter believed by applicant to be fully supported by the present application.
